Frankie Bruno

Web Developer

I'm a web developer seeking with six months of hands-on experience and a ten-year background in business development. I graduated from the Nashville Software School (NSS), where I gained skills in HTML5, CSS, Tailwind, Bootstrap, JavaScript, React, Django, SQL, Postman, REST API, Node.js, and MongoDB, along with technical support and B2B communication proficiency.

I successfully launched and sold my business, enhancing my project management and negotiation skills. Afterward, I contributed to a family business. My diverse background in marketing and customer relations, combined with my tech skills, makes me well-rounded and ready for new challenges.

With a versatile skill set and strong interpersonal skills developed through years of customer service, I'm well-prepared for a coding role. I'm eager to contribute, learn, and grow within your organization, confident that my mix of skills and experiences will be a valuable asset to your team.
